HOBBIES

I am a fitness freak and have been working out since last 3 years, I involve myself in online debates about the things going around the world. I always learn about the new concepts of current technologies. I also play video games when I have my spare time for myself. And I have recently picked up photo shopping as my hobby too. And for the last but not the least I am really into charity work and I do donate to online charity works every month and I have made it a part of my life. I have also gone to a couple of orphanages with my college team. And seeing the happy faces of the kids over there makes my life more purposeful.
